

CL236/S1 Roller Fairlead MK1 with front becket

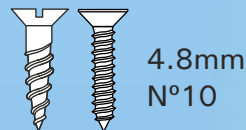

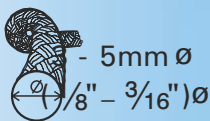

- The becket holds the end of the rope under the cleat to allow rigging with a 2:1 advantage. It is easier to pull heavy load.
- The becket also holds shockcord and bungee under the cleat.
- **Available in two finishes:**
 - CL236/S1 with becket has a silver stove enamel finish for a cost effective, high quality coating.
 - CL236AN/S1 with becket has a hard anodised finish to give a harder wearing surface.

Rigging with a 2:1 advantage

With a shockcord under the cleat

Accessories for CL236/S1

The **CL814 Keeper** automatically keeps rope in or out of the cleat.

The **CL816 Cage** provides alignment and cleating from a distance.

The **CL818 Tapered Pad** aids correct rope/cleating alignment.
